

REJÜVACEL®

MAXIMUM JOINT PROTECTION

Are you:

- Having stiff or aching joints?
- Wanting to improve your overall joint health?
- Finding it difficult to recover from strenuous activity and exercise, due to joint pain?
- Having problems with sagging skin?

The Problem:

Normally, we are able to move around with great fluidity and ease. As we age, issues with our joints may arise, causing stiffness, achiness, difficulty performing everyday activities, pain in knees, shoulders, elbows, fingers, hands, etc. Bones and joints are supported by cartilage and under normal circumstances, as cartilage wears down, it also rebuilds and repairs itself. However, as we get older, cartilage production slows down and with cartilage that can no longer repair itself quickly, comes the pain, soreness, and difficulty in movement.

The Solution:

RejüvaCel is a nutritional formulation to protect and support healthy joints and supply vital nutrients to skin and connective tissues. With ingredients such as Glucosamine Sulfate, Chondroitin Mucopolysaccharides and Shark Cartilage, antioxidants like Vitamins A, C and E, also play a large part in why RejüvaCel helps ease joint pain. Not only does RejüvaCel assist with joint difficulties, it also helps support development of connective tissue and helps improve quality of skin, hair, and nails.

The Results:

- With regular use, RejüvaCel can help alleviate daily discomfort associated with joint pain, injury and/or connective tissue damage.
- Assists with flexibility and mobility
- By helping to alleviate joint pain, a person can resume most normal activities with little or no discomfort.
- Added antioxidant power helps improve quality of skin, hair and nails.
- Improved quality of life as you are able to resume daily activities
- Helps to tighten up loose and sagging skin

DIRECTIONS: For the first three months, take 2-3 caplets once daily. Thereafter, take 1 tablet per day for maintenance. RejüvaCel is best when taken with food. For greater results, follow the RejüvaCel Health & Skin care program: Avoid over-exposure to the sun, drink plenty of water, use a good moisturizer, follow a good diet, reduce stress, and get plenty of exercise.
